

+ Thank You, from Uganda & Nepal!

As midwifery students, our time in Uganda and Nepal has been enriching and full of incredible clinical and life experiences. We have had the opportunity to provide care for strong women who face so much hardship in the labour and delivery room, and support them through their joys and sorrows. We built formidable connections with our midwifery, physician, and nursing colleagues, and had the chance to teach and be taught by our partner hospital staff. We feel so fortunate to have had this opportunity to learn, teach, develop as future practitioners, and grow as global citizens.

On behalf of ourselves, our instructors, and our program, we would like to thank you for all of your support towards our endeavours to strengthen the international maternity provider community, and improve maternal and child health globally. *Weebale nnyo/ Dhanyabad!*

Sincerely,
